Subject: RE: Ohio River sample Results for 4-MethylCyclohaxneMethanol (cis and Trans)

These samples were collected by USGS. Please check with John Gilbert

Thank you, Raj.

- Just curious. Do you have more info on where these were collected?

- Is the attached MSDS for a similar compound or is it part of the mixture? ….or is my chemistry background so poor it's the same compound?

Jack

Subject: Ohio River sample Results for 4-MethylCyclohaxneMethanol (cis and Trans)

John,

Please find attached MSDS data , analysis results , and Chain of custody for the 12 samples for 4-MethylCyclohaxneMethanol . The sample results shows the presence of 4-MethylCyclohaxneMethanol at low ppb level (0.31 to 0.66 ppb). The analytical method was developed based on EPA Method SW 8270, and all requirement for NEALC were met. The SOP (SERAS 1857) for GC/MS is under preparation based on method developed on fast track.

If there are any questions, Please call me.

Thanks.

-Raj
